

EMAN2

Changes to Tutorial

- ④ Small set for ribosome -> ~2000 ptcl
- ④ Use far from focus images for the small sets.
- ④ Note that many tasks really need a large/high resolution monitor.

BDB

- ④ Embedded database
 - ④ No server, easy maintenance
 - ④ Fast
 - ④ Multiple processors on 1 machine - No file corruption !
 - ④ Arbitrary metadata (header information)
- ④ Widely used (now owned by Oracle, but free)
- ④ EMAN2DB directories

BDB Warnings

- ⦿ PLEASE READ:

<http://blake.bcm.edu/emanwiki/EMAN2/DatabaseWarning>

- ⦿ `e2bdb.py -c`
- ⦿ Do NOT move files within an EMAN2DB directory around !
- ⦿ If you need to remove files from an EMAN2DB directory: `e2bdb.py -c`
- ⦿ Do NOT delete or rename directories containing EMAN2DB directories without running `e2bdb.py -c` first.
- ⦿ If you DO get a message saying there is a database error: `e2bdb.py -c`
- ⦿ Beware of network mounted filesystems.

How Do we Stop This ?

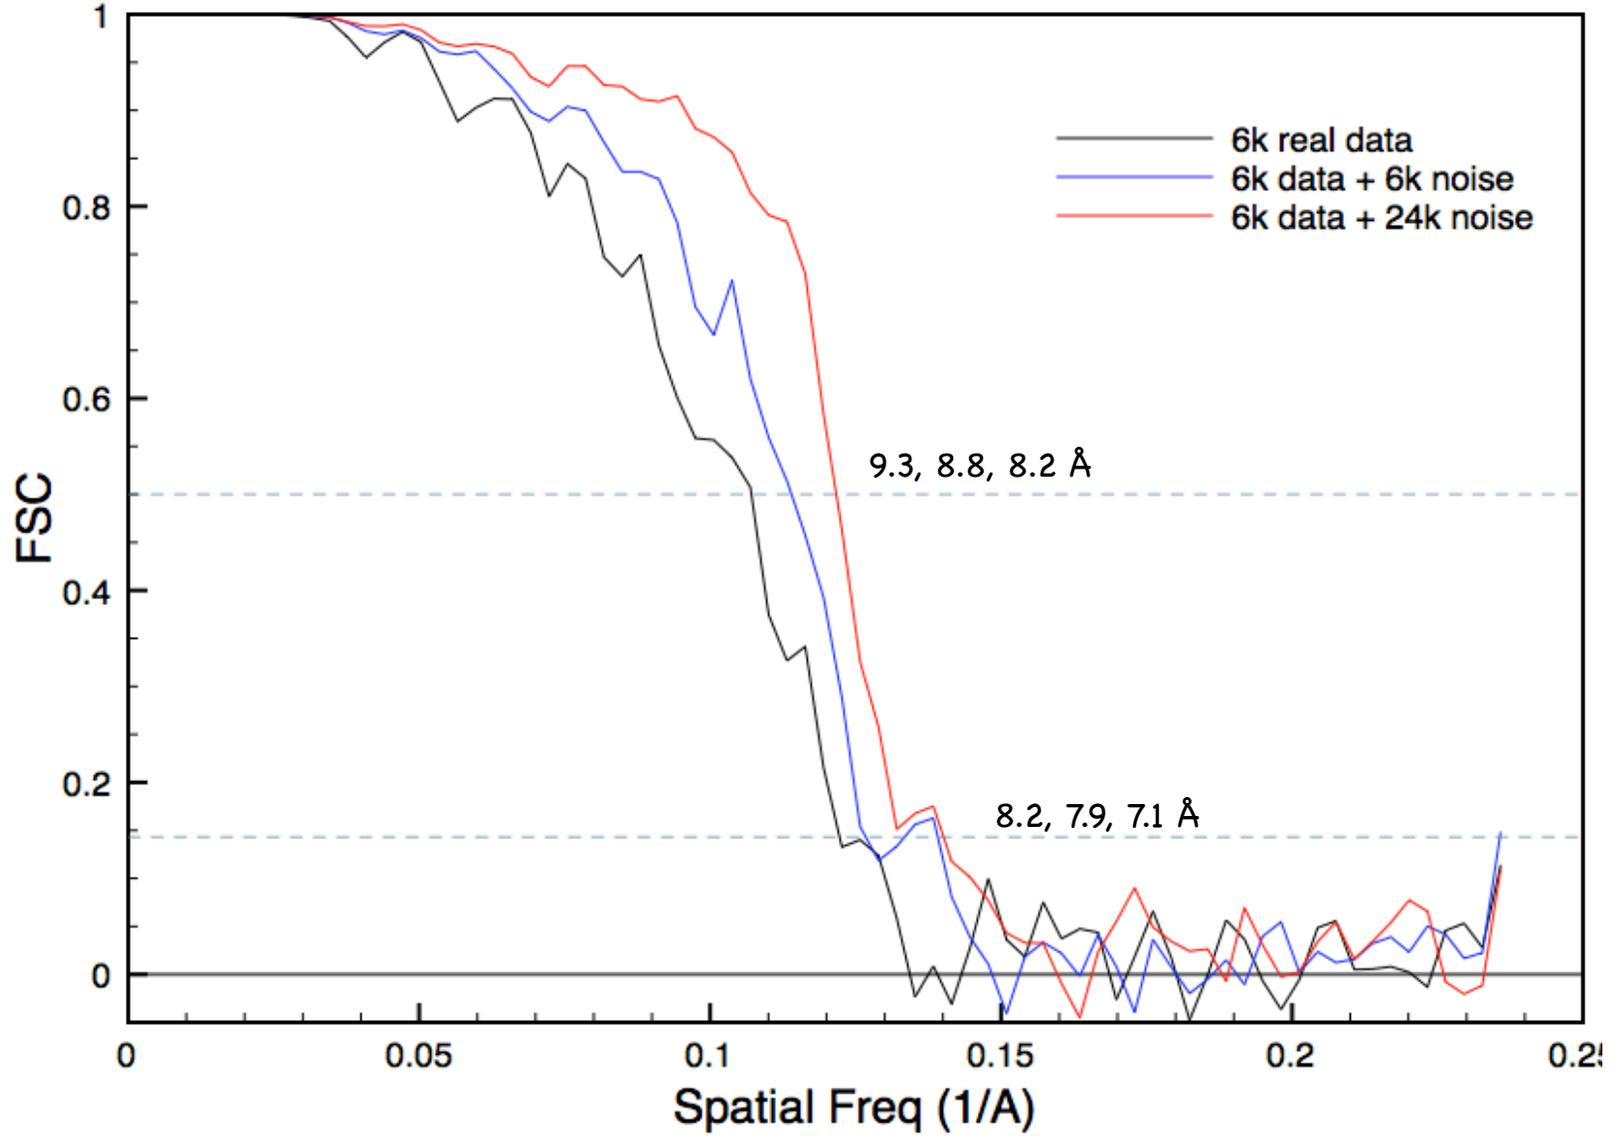

- ④ (In EMAN) use classiter>3 for a few rounds
- ④ Use several different (random) starting models and insure that you get a good answer
- ④ Compare 3D models with results of 2D analysis
