

# Homework 6

1. Install numpy/matplotlib/[scipy] on your computer.
2. Rewrite the program for Homework 5 (the histogram generator) to make use of numpy/matplotlib. You can recycle as much or as little of your previous program as you like. You may ask for the min/max/nbin values from the user, or have them automatically computed. Your choice. The only required change from the last program is that the output needs to be graphical, like:
